

Muhammad Hasnain Rafique

Python Backend Developer | Django, Flask & FastAPI | RESTful APIs

hasnainrafique608@gmail.com | +92-321-9378515 | linkedin.com/in/hasnainrafiqueofficial | github.com/hasnainrafique885-oss

PROFESSIONAL SUMMARY

Final-year BS Computer Science student (GCUF, 2026) with hands-on experience designing and building backend systems using Python, Django, Flask, and FastAPI. Delivered 2 production-ready backend projects featuring RESTful APIs, relational database design, and role-based access control. Seeking a junior backend developer or internship role to apply clean, maintainable backend engineering skills in a professional environment.

TECHNICAL SKILLS

Programming Languages: Python, SQL

Backend Frameworks: Django, Flask, FastAPI, Flask-Login

Database Management: MySQL, SQLAlchemy ORM, Relational Database Design, Schema Design, Query Optimization, CRUD Operations

API Development: RESTful API Design, Pydantic Validation, Swagger UI / OpenAPI 3.0, API Integration & Testing, Postman

Architecture & Security: MVC Architecture, RBAC, Authentication & Authorization, Session Management, Input Validation

Tools & Practices: Git, GitHub, VS Code, Postman, Version Control, Debugging

PROJECTS

Nexus Solution — College Management System

2026

Final Year Project · Python · Flask · SQLAlchemy ORM · MySQL · Jinja2

- Built a multi-portal Flask web application with Role-Based Access Control (RBAC) across 3 user roles (Admin, Faculty, Student), with isolated permission scopes and secure session handling via Flask-Login.
- Designed a normalized MySQL database schema with 8+ interconnected SQLAlchemy ORM models covering student enrollment, course management, timetable scheduling, and announcements.
- Structured the codebase using MVC architecture, separating business logic, SQLAlchemy ORM models, and view templates for maintainability and scalability.

Campus Treasury — Campus ERP & Finance Platform

2026

Python · Django · FastAPI · MySQL · REST APIs

- Built a full campus finance and administration platform with 10+ modules — fee management, transport fees, disciplinary fines, salaries, expenses, and budget planning — on a hybrid Django + FastAPI backend.
- Implemented role-based access control (Admin, Accountant, Viewer) with account lockout after repeated failed login attempts, plus a full audit log for tracking financial actions.
- Designed a relational MySQL schema supporting end-to-end financial reporting, data export (CSV/Excel/PDF), and bulk fee-reminder workflows across finance modules.

EDUCATION

Bachelor of Science in Computer Science

Oct 2022 – Present

Government College University Faisalabad (GCUF), Punjab, Pakistan

Expected: 2026

Relevant Coursework: Data Structures & Algorithms · Object-Oriented Programming · Database Management Systems · Software Engineering · Operating Systems · Computer Networks · Web Development

CERTIFICATIONS

- Fundamentals of Python Programming

freeCodeCamp · 2026

- Introduction to Databases and SQL

Great Learning · 2025
